

**Que-6 : List any 5 semantic tags in HTML along with their descriptions.**

1. **Header element :** The <header> element represents a container for introductory content or a set of navigational links.

**A <header> element typically contains:**

**one or more heading elements (<h1> - <h6>)**

**logo or icon**

**authorship information**

2. **Footer element :** The <footer> element defines a footer for a document or section.

**A <footer> element typically contains:**

**authorship information**

**copyright information**

**contact information**

**sitemap**

**back to top links**

**related documents**

3. **Aside element :** The <aside> element defines some content aside from the content it is placed in (like a sidebar).

**The <aside> content should be indirectly related to the surrounding content.**

4. **Section element :** The <section> element defines a section in a document.

**"A section is a thematic grouping of content, typically with a heading."**

**A web page could normally be split into sections for introduction, content, and contact information.**

5. **Article element :** The <article> element specifies independent, self-contained content.

**An article should make sense on its own, and it should be possible to distribute it independently from the rest of the web site.**
