Que-3 : Write a short note on tags, elements and attributes along with relevant examples.

Tags : Tags are the starting and ending part of an HTML element. Tags begin with < symbol and end with > symbol. Whatever written inside < and > is called a tag.
**Example :   , <head> </head> are some of the commonly used tags in HTML. Some the tags in HTML do not have closing tags, e.g.
 tag, but for the sake of convenience it can be written as <br />.**

Elements : Elements wrap the contents written between the tags. It consists of a kind of structure or expression. Elements generally consists of a starting tag, content and a closing tag.
Example : <h1> This is a content. </h1>

Attributes : It defines some additional properties of an element. Attributes are always placed inside the opening tag of an element.
Example : <p align="center"> This is a Paragraph. </p>
